

ELICA,
ARIA E LUCE
*elica,
air and light*

Aria e luce sono elementi di vita, disegnano lo spazio che abitiamo, sono il luogo in cui si incontrano persone e cose, impalpabili e protagonisti al tempo stesso della nostra quotidianità. Aria e luce sono gli elementi con cui Elica si misura ogni giorno, sono il respiro, lo sguardo e il pensiero che guida la progettazione di tutti i nostri prodotti.

Scopri quanto l'aria può essere luminosa.

Air and light are two of life's key elements. They shape the space we live in, the place where people and things meet; it's fair to say they play an imperceptible yet central role in our daily lives. Air and light are the elements that allow Elica to take on the challenges each new day brings: they represent every breath and look we take as well as every thought that crosses our minds during our product design projects.

See just how bright air can be.

35cc evoque/dynamique

design Fabrizio Crisà

Design, versatilità e prestazioni al cubo.

La semplicità delle linee disegna un cubo dai raccordi armoniosi, celando performance e versatilità di altissimo livello ed evocando un incontro tra stile retrò e modernità, attraverso l'incastro di materiali e forme. I modelli offrono un'ampia gamma di varianti per integrarsi nel tuo ambiente e la possibilità di personalizzare la propria versione. Dopotutto, esistono gesti e dettagli che parlano di te, raccontano la tua vita.

(pp. 26, 28, 102, 104)

Design, versatility and performance. Cubed.

What stands out about this perfectly formed cube is the simplicity of its lines. High performance and high versatility are enclosed in this box of retro and contemporary style that also mixes materials and shapes. We also offer an extensive range of custom options so you can personalise your preferred model to suit the interior. After all, it's the small details that show who you really are and tell the story of your life.

(pgs. 26, 28, 102, 104)

70cc evoque/dynamique

design Fabrizio Crisà

Segni di un carattere deciso.

Riflessi e cromatismi scandiscono accenti vintage su materiali tecnologici, soluzioni innovative e linee contemporanee, in un equilibrio esatto tra aria e luce. Tecnica ed intelligenza si svelano nella gamma di soluzioni adottabili per la messa in opera, rendendo Evoque e Dynamique protagoniste del tuo spazio grazie alla capacità di trasformare il proprio ruolo aspirante-filtrante dell'aria.

(pp. 30, 32, 106, 108)

Strong hoods for strong personalities.

Reflections and colours add a splash of vintage style to the cutting-edge materials, innovative solutions and contemporary lines. In this way the perfect balance between air and light is struck. The range of start-up options demonstrates the technical know-how and intelligence put into the design of Evoque and Dynamique. They are sure to play a central role in your kitchen and prove their versatility with the recirculation-ducted configurations.

(pgs. 30, 32, 106, 108)

cloud nine
design Fabrizio Crisà

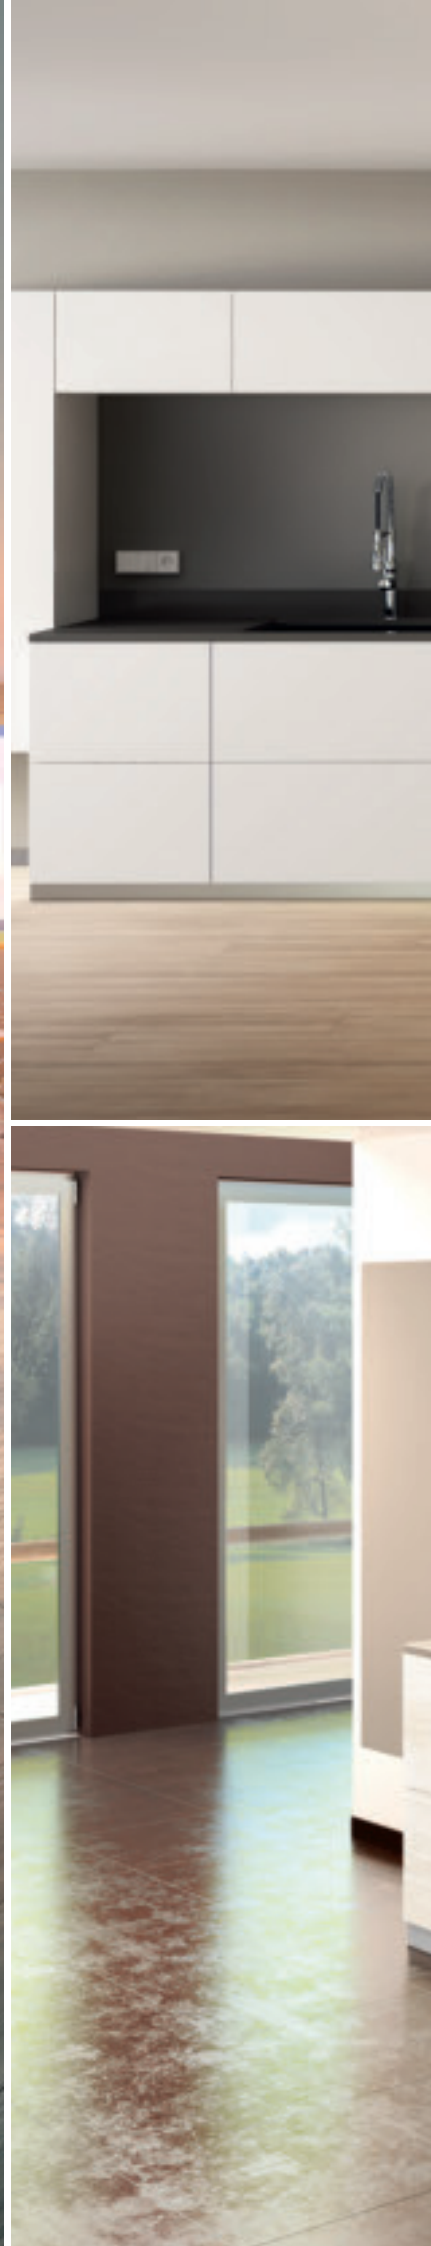

La purezza delle linee scompare in una nuvola.

Cloud Nine si caratterizza per l'eleganza delle linee che, liberandosi dai vincoli formali, conferisce al prodotto un'ampia versatilità d'uso. Il segno si svela nella purezza dell'aria creando nuovi volumi dove far danzare aria e luce, in un'alchimia di raffinatezze e design, riflessi e carattere, visibili nel modo in cui interagisce con lo spazio; eppure discreta come una nuvola. (pag. 118)

Pure lines disappear in a cloud.

Cloud Nine stands out for its stylish lines which, free from any kind of formal restriction, make the product extremely versatile. The hood's key characteristic is the pureness of air: it creates new volumes where air and light dance about in a magical process of design and style, reflection and personality. This can be seen in the way that Cloud Nine interacts with space; and yet it seems as unobtrusive as a cloud... (pg. 118)

feel
design Fabrizio Crisà

Un mosaico di volumi si rincorrono intorno ad un semplice gesto.

L'energia scorre lungo le superfici, in una combinazione armoniosa di luce, aria e funzioni che si attivano con un semplice gesto e si adattano alle tue esigenze: il pannello più piccolo per cotture a basse emissioni di vapore, quello più grande o entrambi per cotture più intense; il pannello orizzontale regola l'illuminazione. (pag. 34)

An intricate mosaic of volumes based on a simple movement.

Energy flows up and down its surfaces, with light, air and touch activation in total harmony. The product can be made to work just the way you like it as well: the smallest panel is the one to use for relatively fume-free cooking, the biggest one (or both) can be used for more intensive cooking and the horizontal panel is for light adjustment. (pg. 34)

tiffany

design Fabrizio Crisà

Il sottile confine tra eleganza e funzionalità.

Tiffany è stata concepita per restituire il massimo della qualità e dell'innovazione tecnologica: dal pannello frontale con intercapedine capace di captare l'aria convogliata da tutto il perimetro, all'interfaccia comandi ad infrarossi con funzione touch. Ogni dettaglio scompare e si svela nel momento in cui ne hai bisogno, diventando un elemento di design che allo stesso tempo è funzionale al suo scopo. La tecnologia più innovativa scompare ai tuoi occhi. (pag. 38)

The thin line between elegance and functionality.

Tiffany was designed to help you get the best quality possible and take advantage of recent technological advancements. Take the frontal panel for instance, whose air cavities capture the air directed across the entire surface, or the infrared touch control interface. Every feature can be made to appear and disappear as and when required, meaning that Tiffany is a piece of design which does what it is intended to do with the minimum of fuss. Cutting-edge technology that disappears before your very eyes... (pg. 38)

sweet

design Fabrizio Crisà

La capacità di leggere il presente superando le mode.

Sweet è l'interpretazione contemporanea di un'icona classica. Il design diventa sinuoso e attuale grazie all'utilizzo del tecnopolimero, scandito da una sottile linea d'acciaio lucido che ne accentua le forme disegnando l'evoluzione della cappa camino. Moderni sistemi di aspirazione perimetrale e di illuminazione a luce strip a led, controllati da comandi capacitivi, sono ideali per diffondere la luce e controllare le emissioni sul piano cottura. (pag. 78)

Making sense of the present while going beyond trends.

Sweet is a contemporary interpretation of a classic icon. The technopolymer construction is key in creating a contemporary and sinuous design and a thin, polished steel line helps the hood stand out, tracing the progression of the chimney. The modern perimeter aspiration system and the LED striplight are controlled by capacitive controls. These help optimise cooking fume capture and control light diffusion respectively. (pg. 78)

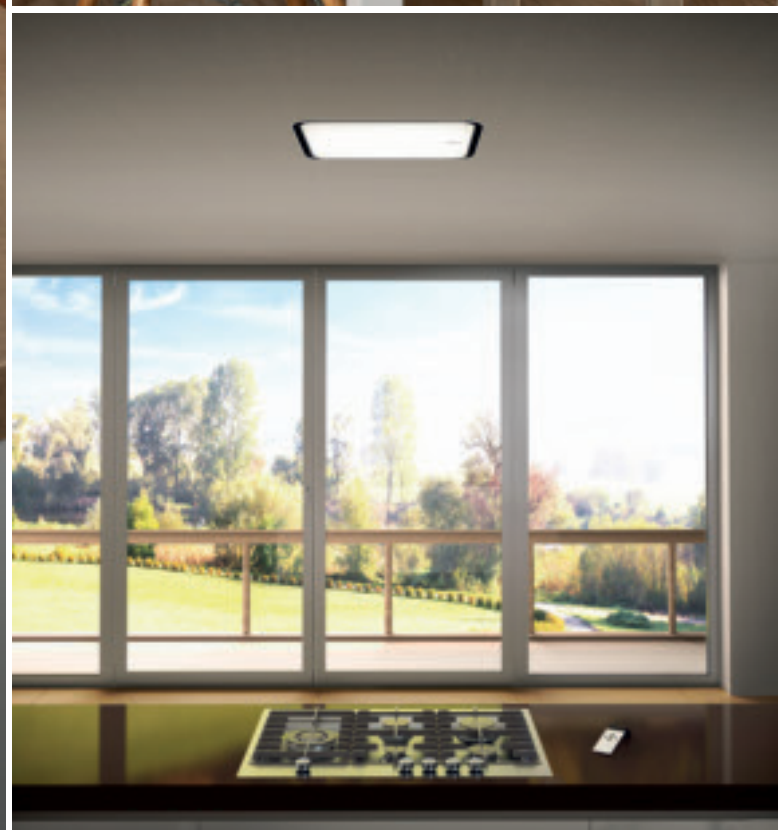

**Tecnologia
per guardare in alto.**

Up consente di pensare l'ambiente cucina in completa libertà, associando gli elementi modulari per l'aspirazione e l'illuminazione rispetto alle tue esigenze d'illuminazione e filtraggio dell'aria. Alza lo sguardo e scopri che tutta la tecnologia di cui hai bisogno è perfettamente integrata nel soffitto della tua cucina, ora non ti resta che azionarla. (pag. 114)

**Technology
that will make you look Up!**

Up gives you the freedom to design your kitchen as you want to. The product combines aspiration and lighting modules depending on what your aspiration and lighting needs actually are. Look Up and you'll see that all the technology you need is tucked away in the ceiling of your kitchen. All you have to do now is turn it on... (pg. 114)

belt
design Fabrizio Crisà

L'essenziale è visibile agli occhi.
Belt esprime al meglio l'unione tra ergonomia e forma. Disegnata associando una superficie in vetro ad un elemento d'acciaio lucido delega ai rispettivi materiali il compito di restituire eleganza e carattere, armonia e solidità. (pag. 46)

Essential forms appear before your very eyes.
Belt is a flawless example of ergonomic and formal unity. The design concept is a glass surface matched with a polished steel element and the role of these materials is to add style, character, unity and solidity. (pg. 46)

om
elica design center

**Ascolta il tuo respiro,
cerca il perfetto equilibrio.**
L'essenziale prende forma,
geometrie perfette scandiscono
lo spazio ed il tempo nelle
semplici forme del cerchio e
del quadrato. (pag. 42)

***Listen to your breathing
and strike the right balance.***
*Essential forms come to life
and the simple shapes of the
ring and square panel show
how perfect geometry can mark
space and time. (pg. 42)*

wave
elica design center

Un'onda di luce e acciaio.

Evolution è il sistema brevettato capace di racchiudere il cuore di tutta la tecnologia necessaria in uno spazio estremamente compatto, controllabile tramite la sua interfaccia sensoriale Magic Wand o a distanza per mezzo del radiocomando opzionale. Wave è un'onda sospesa tra vuoti e pieni, tra respiro e sguardo, tra essenza ed eleganza. (pag. 94)

A wave of light and steel.

The exclusive Evolution system is an Elica patent and houses all the required technology in an extremely compact cylinder. Settings can be adjusted using the cutting-edge Magic Wand interface or an optional remote control. Wave: floating between empty and full, essence and elegance, and breathing and looking. (pp. 94)

La magia di essere protagonista.

La bellezza monolitica del guscio in tecnopolimero si armonizza elegantemente con i dettagli dell'acciaio lucido e del vetro. Wizard definisce nuove frontiere nello stile, nella scelta dei materiali e nell'ergonomia, eppure tutto è così naturale ai tuoi sensi da sembrare quasi magico. (pag. 116)

Taking centre stage is magic.

The almost monolithic beauty of the technopolymer shell complements the polished steel and glass features perfectly. Wizard is pushing the boundaries of style, especially in terms of materials and ergonomics, yet it seems so natural it's almost...magical. (pg. 116)

**Un guscio che racchiude
la meraviglia di piccole perfezioni.**

Shell racchiude in un elemento naturale ed armonico tutta l'attenzione per il dettaglio, un guscio di elegante vetro opalino dove concentrare in sospensione la luce e l'aria. L'attenzione ai dettagli restituisce lo stupore di un oggetto che svolge al meglio le sue funzioni e che dona all'ambiente eleganza e prestigio (pag. 88)

Encapsulating the wonder of small details.

Shell captures attention to detail in a natural, perfectly balanced creation. The opal glass design collects and retains both light and air. The thought put into the design is clear for all to see: the stunning object matches high performance while its sheer class and prestige rubs off onto any interior setting. (pg. 88)

shell
design Fabrizio Crisà

Armonia di flussi e riflessi.

Le morbide curve delle superfici in vetro ne rivelano le funzioni: luce nella parte superiore, aria in quella inferiore, in armonioso dialogo tra loro. (pag. 40)

Light and reflections in perfect harmony.

The soft curves of the glass surfaces reveal the product functions: light at the top, air at the bottom and both in harmony with one another. (pg. 40)

sinfonia
design Fabrizio Crisà

Accarezzare l'aria che cambia.

Skin è disegnata intorno ad una grande superficie filtrante d'acciaio microforato capace di convogliare i flussi d'aria sia nella parte superiore che in quella posteriore, come il respiro della sua pelle. (pag. 44)

Change the air with a gentle caress.

Skin consists of a large steel mesh filter and airflows pass through at both the top and bottom. Just like your skin! (pg. 44)

skin
design Fabrizio Crisà

● RETE PRODUTTIVA *production network*

ELICA SPA (ITALIA) Cerreto d'Esi, Mergo, Serra S. Quirico, Castelfidardo

Nel plant di Cerreto d'Esi si effettuano le operazioni di taglio dei materiali metallici; a Serra San Quirico si producono cappe in acciaio inox; a Mergo i prodotti ad alte tirature con automatizzazione; a Castelfidardo si producono i motori elettrici per cappe, caldaie e elettrodomestici.

The Cerreto d'Esi plant carries out operations involving the cutting of various metallic materials; Serra San Quirico is responsible for the production of stainless steel hoods; Mergo handles automated mass production; and Castelfidardo produces electric motors for cooker hoods, boilers and domestic appliances.

ELICA GUTMANN GMBH (GERMANIA) Muhlackner

Nello stabilimento di Muhlackner si producono cappe da cucina high end e di "sartoria industriale" altamente performanti.

The Muhlackner plant is responsible for high-end cooker hoods and high-performance "tailor-made" industrial production.

ELICA GROUP POLSKA Sp. z o.o. (POLONIA) Jelcz-Laskowice

Nel polo industriale di Wrocław, lo stabilimento più grande del Gruppo produce cappe destinate ai mercati dell'est Europa e motori elettrici per cappe, caldaie e elettrodomestici.

In the industrial area of Wrocław, the Group's largest factory produces cooker hoods for the Eastern European markets and electric motors for cooker hoods, boilers and domestic appliances.

ELICAMEX S.A de C.V. (MESSICO) Queretaro

Il plant, nel parco industriale di Queretaro, produce gran parte della gamma prodotti destinata ai mercati delle Americhe.

The Mexican plant, in Queretaro's industrial area, produces a large part of the product ranges destined for the Americas.

ELICA PB INDIA PRIVATE LTD (INDIA) Pune

Nello stabilimento di Pune si producono cappe, piani e forni per servire i diversi segmenti del mercato indiano.

The Pune plant produces cooker hoods, cook-tops and ovens to serve various segments of the Indian market.

ZHEJIANG PUTIAN ELECTRIC CO. LTD (CINA) Shengzhou

Nel parco industriale Putian si producono cappe, piani a gas, sterilizzatori per stoviglie e motori elettrici per caldaie e elettrodomestici.

The Putian factory is responsible for cooker hoods, gas cook-tops, tableware sterilisers and electric motors for boilers and domestic appliances.

ELICA, MARCHIO VINCENTE

elica = success

Elica, marchio di innovazione: investiamo costantemente in innovazione, tanto da conseguire per il secondo anno consecutivo il Premio Imprese x Innovazione dell'Associazione italiana della categoria degli imprenditori Confindustria.

Elica, marchio di know how: il nostro plus è rappresentato dallo staff, in grado di raggiungere importanti obiettivi, dividerne le direzioni e nuove sfide. Nel 2008 Elica ha stipulato il premio Contratto Integrativo Aziendale, ritenuto un'eccellenza.

Elica, marchio di stile: l'Ufficio stile de Il Sole 24 Ore Business Media ha conferito ad Elica il premio US Award 2008 Workplace per la qualità e l'innovazione, in merito al progetto di ristrutturazione degli spazi per gli uffici Corporate di Fabriano.

Elica, marchio di benessere: grazie al Great Place to Work 2011 Elica conquista il primo premio nella classifica dei luoghi dove si lavora meglio in Italia e in Europa. Un importante riconoscimento che anticipa l'inserimento, per il terzo anno consecutivo, nell'annuario Top

Employers Italia 2011.

Elica, marchio di comunicazione: l'attenzione per la comunicazione web è un aspetto imprescindibile per Elica, ciò ha permesso all'azienda di essere riconosciuta un'eccellenza internazionale grazie al premio "Standard of Excellence" dei prestigiosi Web Awards 2011.

Elica = innovation. We are committed to ongoing investment in innovation. Need proof? Well, for a second year running we received the Business 4 Innovation Prize (Premio Imprese x Innovazione) from Confindustria, the foremost national organisation representing Italian manufacturing and service companies.

Business Media group awarded the US Award 2008 Prize for quality and innovation in the workplace. This was in recognition of the renovation work carried out in the company's corporate offices in Fabriano.

Elica = well-being. Elica took first prize in the 2011 Great Place to Work awards which companies all over Italy and Europe had been nominated for. This was swiftly followed in 2011 by our inclusion in the Italy's Top Employers list for a third consecutive year.

Elica = marketing&communication. Web marketing and communication is a key part of the Elica strategy and our commitment and effort was rewarded with a top international prize (the "Standard of Excellence" award) at the prestigious Web Awards 2011.

Elica = design Elica. embodies innovation and design, as shown by the Good Design Award 2008 we took home for the Ola hood. Skin, the radio-style hood designed by Fabrizio Crisà, won the Red Dot Design Award 2011 together with the Gutmann brand Sombra hood.

PREMIATI PER LA QUALITÀ OPERATIVA E DI PRODOTTO, PER IL DESIGN, L'INNOVAZIONE, LA COMUNICAZIONE E LA CURA DELLE RISORSE UMANE

we have received awards for the quality of our production processes and products as well as for design, innovation, marketing and our respect for our employees

Elica, marchio di design: Elica rappresenta innovazione e design, la cappa Ola ha vinto il Good Design Award 2008. Nel 2011 Skin, la cappa che ricorda una radio disegnata da Fabrizio Crisà, ha vinto il Red Dot Design Award 2011 insieme alla cappa Sombra a marchio Gutmann.

Elica = know-how. We are proud of the ability of our staff to meet important targets and take the lead in terms of management and new challenges. In 2008, Elica received an award in recognition for its in-house employment agreement, which is held in high regard.

Elica = style. The Ufficio Stile magazine of the Il Sole 24 Ore

reddot design award
winner 2011

MESTIERE ARTIGIANO EVOLUTO IN LABORATORIO

craftsmanship moves to the laboratory

La nostra è la visione di chi ricerca la perfezione della tecnica senza tradire lo spirito e la cura artigiana con cui da più di quarant'anni Elica produce cappe uniche nel loro genere. I nostri prodotti nascono dalla penna dei designer, vengono modellati dalle mani degli artigiani e assemblati secondo i più alti standard tecnologici e qualitativi. Ogni aspetto merita tempo e attenzione, dalla scelta dei materiali alla cura dei dettagli, dalle fasi di produzione alla cura manuale della post-produzione, affidata a specialisti responsabili dell'alta qualità del prodotto finito. La cappa Elica deve essere in grado di interpretare lo spirito made in Italy tipico delle aziende di eccellenza.

Allo stesso tempo poniamo la massima attenzione alla sicurezza, nella scelta delle materie prime, dei meccanismi di funzionamento e dell'ergonomia d'utilizzo, aspetti che vengono sottoposti a severi controlli e certificati secondo le più rigorose normative d'utilizzo.

Per questo motivo nasce Elica TechLab, un laboratorio preposto allo sviluppo ed al controllo di ogni prodotto. Il suo obiettivo è dare un supporto operativo, tecnico e metrologico alla Ricerca & Sviluppo, alla Supply Chain ed alla realizzazione del prodotto finito. TechLab si traduce in garanzia di sicurezza, affidabilità e prestazioni di

tutti i prodotti del Gruppo Elica. Il laboratorio è un punto di riferimento internazionale per la sicurezza, essendo l'unico ad aver ottenuto da UL3 International Demko4 sia la certificazione SMT5 che la CTD6 per l'elettrodomestico cappa. Gestiamo inoltre Elica TechLab in perfetto accordo con le norme UNI EN ISO/IEC 17025. Crediamo che un'azienda moderna debba pensare

CONTINUA INNOVAZIONE NEI PRODOTTI, CURA DEL DETTAGLIO ED ALTA QUALITÀ TECNICA. SOLUZIONI CAPACI DI RACCHIUDERE L'ESSENZA DEL MADE IN ITALY: STILE E QUALITÀ IN ASSOLUTA SICUREZZA.

ongoing product innovation, attention to detail and a high degree of technical quality. our solutions capture the essence of italian-made products: style, quality and 100% safety.

alla propria crescita nel rispetto e nel dialogo con l'ambiente. Selezioniamo processi produttivi, materiali e tecnologie che siano rispettosi dell'ambiente e in grado di limitare il consumo di fonti di energia non rinnovabili, inoltre ci assicuriamo che questo avvenga durante tutto il ciclo di vita del prodotto.

Our vision is to strive for technical perfection without taking anything away from the spirit and craftsmanship that has enabled us to make truly unique hoods for over 40 years. Our hoods originate as sketches penned by our designers and are then brought to life by the capable hands of our craftsmen, who build the prototypes. Finally, the end product is assembled in line with the highest

technological and quality standards. Every detail is carefully considered at some length, whether it be the choice of materials, product features or the production process itself. The post-production stage is handled by specialist personnel who ensure the finished product is of the highest quality. Elica hoods are manufactured according to the spirit and values that Italian-made products and leading Italian companies are known for. Another one of our core principles is safety. This guides our selection of

materials and functions as well as shaping product ergonomics. Rigorous testing is routinely carried out and product safety is measured against the strictest quality regulations around today.

To make the process easier we decided to open the Elica TechLab, a purpose-built laboratory for product development and control. It aims to provide operational, technical and metrological support for R&D, the supply chain and product manufacture.

TechLab is your guarantee that all of the products made by the Elica Group are safe, reliable and high performance.

The lab sets an international standard in terms of safety and we are proud that it is currently the only one of its kind in the world that has achieved both the SMT5 and CTD6 certification from UL3 International Demko4 for extractor hood appliances. Elica TechLab also complies fully with UNI EN ISO/IEC 17025 standards. We at Elica feel that a modern company can only go about its business in a sustainable manner. Consequently, we only choose production processes, materials and technology that are environmentally friendly and which limit the use of fossil fuels or non-renewable energy sources. Furthermore, we ensure that this won't change throughout the product's life.

CODICE DI CONDOTTA

code of conduct

Elica e i più prestigiosi marchi di elettrodomestici europei, sostengono il Codice di Condotto Cappe promosso dal CECED.

Il codice è un valido strumento per informare l'utente verso un acquisto più consapevole, fornendo tutti gli strumenti per comprendere parametri uniformi nel calcolo dei valori di aspirazione e rumorosità, a garanzia di maggiore trasparenza nelle informazioni. Tutti i dati sono conformi agli standard stabiliti dalle norme europee (EN 60704-2-13, EN 60704-3, EN 61591) e sono compatibili con le informazioni di altri cataloghi che rispecchiano questi standard.

Elica, together with the most prominent domestic appliance brands in Europe, complies with the Cooker Hood Code of Conduct promoted by CECED.

The code is very useful in that it helps consumers make more informed decisions about which goods to purchase. For example, it establishes standardised methods of calculating suction/extraction values and noise levels, which can only have a positive effect in boosting transparency of information. All data conforms to European standards (EN 60704-2-13, EN 60704-3, EN 61591) and is comparable to the information in other catalogues that respect these standards.

SPACE EDS Digital R BL/A/78	68815548A
SPACE EDS Digital R WH/A/78	68816317A

Il sistema Elica Deep Silence (EDS3) permette una funzionalità estremamente silenziosa, addirittura impercettibile alle basse velocità, con una riduzione dell' inquinamento acustico ambientale di oltre il 35% rispetto alle cappe tradizionali

The Elica Deep Silence (EDS3) system allows the hood to function with the lowest level of noise possible – in fact, at low speeds, there is no perceptible noise at all. This reduction in domestic noise pollution of more than 35% with respect to traditional cooker

Il sistema Elica Deep Silence (EDS3) permette una funzionalità estremamente silenziosa, addirittura impercettibile alle basse velocità, con una riduzione dell'inquinamento acustico ambientale di oltre il 35% rispetto alle cappe tradizionali

The Elica Deep Silence (EDS3) system allows the hood to function with the lowest level of noise possible – in fact, at low speeds, there is no perceptible noise at all. This reduction in domestic noise pollution of more than 35% with respect to traditional cooker

Synairgy

Synairgy è il sistema aspirante per cappe più efficiente al mondo, che rispetta l'ambiente riducendo del 50% il consumo di energia elettrica. Il sistema unisce in perfetta sinergia una macchina elettrica silenziosa, priva di attriti e vibrazioni, a un controllo elettronico intelligente che mette le potenzialità del motore al servizio dell'utente. Il sistema Synairgy, unico nel suo genere, è infatti in grado di autoregolarsi. Garantisce ridotti consumi energetici, aspirazione e silenziosità ottimali in ogni condizione di installazione, perché si adatta automaticamente alle difficoltà di percorso delle condotte d'aria all'interno della cucina e dell'abitazione.

Synairgy is the airflow system for the most efficient hoods in the world, respecting the environment by reducing electrical energy consumption by 50%. Combining in perfect synergy a silent, vibrationless, frictionless electrical machine with an intelligent electronic control which puts motor power at the service of the user, the Synairgy system is unique of its type in that it is also self-regulating. It guarantees reduced energy consumption together with an optimal level of airflow and low noise in every type of installation, adapting automatically to any difficulty presented by air passage inside the kitchen and house.

Chef Control

Con Chef Control la cappa non risponde più ai comandi perché si adatta ai bisogni. Una delicata cottura al vapore o una frittura mista? È sufficiente scegliere la cottura sul display e Chef Control traduce le necessità in comandi, impostando automaticamente l'aspirazione ottimale. In più, le funzioni speciali Silent e Booster soddisfano immediatamente le richieste più comuni: massima silenziosità per un funzionamento non invasivo o massima potenza per aspirare fumi o vapori di particolare intensità. Chef Control rivoluziona il dialogo tra il cuoco e la cappa.

With Chef control, the hood no longer responds to controls, but to necessity. Whether you want to prepare a delicate steamed dish or a rich platter of mixed fried fish, all you have to do is select the cooking type on the display and Chef control translates necessity into action, automatically setting the most appropriate airflow power. In addition, special functions Silent and Booster are available to immediately satisfy the most common requirements: maximum silence for non-invasive operating or maximum power to deal with high-intensity fumes or vapour. Chef control revolutionises the dialogue between cook and cooker hood.

Led light

Queste cappe sono dotate di sistemi di illuminazione basati sulla tecnologia LED (Light Emitting Diode). I LED garantiscono una illuminazione ottimale del piano cottura per agevolare la preparazione dei cibi. Inoltre, hanno una durata fino a 10 volte maggiore delle lampade tradizionali e consentono di risparmiare il 90% di energia elettrica.

These hoods are equipped with a lighting system based on LED (Light Emitting Diode) technology, guaranteeing high quality cooktop illumination that makes the cooking process as easy as possible. In addition, they last ten times longer than traditional bulbs and provide an electrical energy saving of 90%.

Special features

High performance

Modelli dalle performance di aspirazione molto elevate, particolarmente indicati per grandi ambienti cucina o per abitudini culinarie che richiedono intense bolliture, frittura, grigliature.

Models with extremely high airflow performance levels specifically aimed at large kitchen environments or for culinary habits that require a great deal of boiling, grilling and frying.

Perimeter aspiration

L'aspirazione perimetrale è una tecnologia di aspirazione alternativa, dove il flusso dell'aria viene fatto confluire sul perimetro esterno della cappa, riducendo consumo energetico e rumore. Al posto del tradizionale filtro a vista, su questi prodotti è presente un pannello in acciaio o vetro che migliora l'estetica e semplifica le operazioni di pulizia e manutenzione.

Perimeter airflow is an alternative form of air-treatment technology where the airflow occurs around the outer edge of the cooker hood, reducing energy consumption and noise. In place of the original visible filter, these products feature a steel or glass panel, enhancing the look and simplifying the cleaning and maintenance of the product.

Back aspiration

Queste cappe hanno l'uscita dell'aria sia nella parte superiore che nella parte posteriore. In fase di installazione è possibile configurare l'uscita dell'aria a seconda delle esigenze, con una semplice rotazione di 90° del gruppo motore interno. La classica uscita superiore è indicata sia per il funzionamento in filtrante che per il funzionamento in aspirante con camino a vista. L'innovativa uscita posteriore permette invece il funzionamento in aspirante senza la necessità di un camino a vista. In questo caso la cappa dovrà essere collegata a un condotto di evacuazione dei fumi predisposto all'interno del muro su cui la cappa stessa verrà installata.

These hoods have air outlets at the top and on the back. The air outlet can be configured according to need during installation by simply rotating the internal motor unit 90 degrees. The classic top outlet is recommended for both the filter function and for extraction through an exposed exhaust duct. The new rear outlet instead allows the extraction function to be used without an exposed duct. In this case, the hood must be connected to an extraction duct built into the wall on which the hood is installed.

Elica Deep Silence

Le cappe equipaggiate con il sistema Elica Deep Silence (EDS3) sono le più silenziose al mondo. La tecnologia impiegata permette una funzionalità estremamente silenziosa, addirittura impercettibile alle basse velocità, con una riduzione di inquinamento acustico ambientale di oltre il 35% rispetto alle cappe tradizionali. La riduzione del sonoro non pregiudica le prestazioni di aspirazione: le cappe dotate del sistema sono anche tra le più potenti ed efficienti disponibili sul mercato. EDS3 è un brevetto esclusivo Elica.

The hoods equipped with the Elica Deep Silence (EDS3) system are the quietest in the world. The technology employed allows the hood to function with the lowest level of noise possible – in fact, at low speeds, there is no perceptible noise at all. This reduction in domestic noise pollution of more than 35% with respect to traditional cooker hoods is rather like comparing a bustling office environment where everyone is talking at once with one or two people chatting quietly in a library.

While noise level is reduced, airflow performance remains unaffected: in fact, the hoods that come with EDS3 are amongst the most powerful and efficient available on the market. EDS3 is an exclusive Elica patent.

External motor

Queste cappe possono essere dotate di un sistema motore remoto, installabile all'esterno dell'ambiente cucina o anche all'esterno dell'abitazione. Rispetto allo stesso modello con motore interno, il motore esterno migliora del 35% le performance di aspirazione e riduce del 20% il livello sonoro percepito.

These hoods can be equipped with an external motor system, where the motor is installed outside the kitchen environment or even outside the house itself. Compared to the same model with an internal motor, the external motor improves airflow performance by 35% and reduces perceived noise level by 20%.

Exclusive materials

La continua ricerca Elica su funzionalità e bellezza si esprime, in questi prodotti, nella scelta di forme e materiali d'avanguardia. Ogni cappa è unica nel suo genere. Anche i meccanismi di funzionamento si vestono di qualità estetica, come i filtri a vista in acciaio microforato. Design e materiali sorprendenti per tutti i sensi, uniti a performance e funzionalità impeccabili.

These products display Elica's ongoing research into beauty and functionality through the choice of cutting edge forms and materials. Each hood is unique in its own way: technopolymer surfaces, sophisticated polished steel, metallic mesh and visible microperforated steel filters. Materials that surprise and delight every one of our senses, combined with impeccable performance and functionality.

Evolution

Prodotti sviluppati attorno al sistema Evolution, che ha rivoluzionato il mondo della ventilazione in cucina. Un compatto cilindro in acciaio inox contiene le funzioni di aspirazione, filtraggio grassi e odori, illuminazione del piano cottura nonché, in alcune versioni, dell'ambiente cucina. Le cappe Evolution sono oggetti di design leggeri ed eleganti, che si integrano con naturalezza negli ambienti più raffinati. Evolution è un brevetto esclusivo Elica.

Products developed around the Evolution system, which has revolutionised the world of kitchen ventilation. Airflow system, grease and odour filters and lighting (for the cooktop, and, in some versions, for the surrounding area in the kitchen) are all packed into a compact steel cylinder. Evolution hoods are light and elegant design objects that integrate smoothly with the most sophisticated environment. Evolution is an exclusive Elica patent.

Ambient light

L'illuminazione è la condizione per vedere, giocare, cucinare, vivere. Se tutte le cappe Elica illuminano efficacemente il piano di lavoro, quelle dotate di Ambient Light diffondono luce anche nell'ambiente circostante. Una vantaggiosa opzione per disporre di un punto luce in più che illumina e arreda la cucina.

We need light to see, to play, to cook, to live. All Elica hoods provide high quality lighting for the cooktop. In addition, hoods equipped with Ambient Light also spread light into the surrounding area. An extra light source to illuminate and animate your kitchen.

Head Saver

Le cappe Head Saver sono il frutto di studi di ergonomia e usabilità del prodotto. La loro ridotta dimensione favorisce una maggiore libertà di movimento nella preparazione dei cibi e permette di vivere la cucina senza timore di urti involontari.

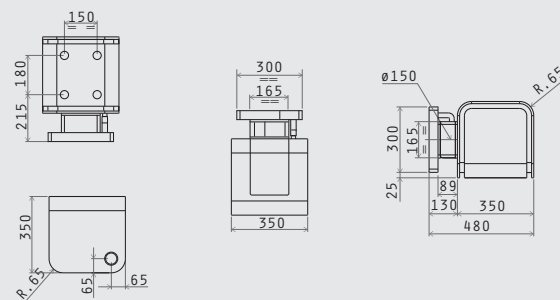

The Head Saver hoods are the result of ergonomic and usability research into the product. Their smaller size facilitates movement around the cooktop and means the cook can work without having to worry about sudden bumps.

KIT STYLE 35CC-70CC kit style 35cc-70cc

I modelli 35cc e 70cc esistono nelle versioni evoque, con pannello di aspirazione perimetrale e in versione dynamique con pannello aspirante macroforato in acciaio lucido. Acquistando i Kit Style hai la possibilità di trasformare la tua cappa da evoque a dynamique e viceversa e addirittura sceglierne il colore.
(N.B. il kit style è un accessorio sostitutivo che può essere acquistato successivamente)

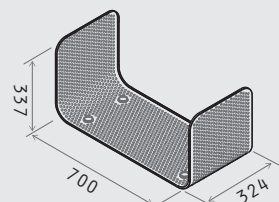

35cc and 70cc models are available in the Evoque version (with perimeter aspiration panel) and the Dynamique version (with perforated polished steel aspiration panel). The style kit enables you to turn your Evoque hood into a Dynamique hood and vice versa. You can even choose the colour!
(Please note: the style kit is an optional extra which can be bought after installation)

UP GUIDA ALLA SCELTA E ALL'INSTALLAZIONE up set-up options and installation guide

È possibile comporre Up in innumerevoli configurazioni a scelta: innanzitutto si stabilisce il numero di moduli aspiranti, da 1 a 3, aggiungendo moduli opzionali al modulo base. Sia il modulo base che gli opzionali possono essere scelti tra 4 diverse finiture. Up si installa all'interno del controsoffitto, dove è eventualmente alloggiabile anche il motore (in aspirante o in filtrante); è possibile collocare il motore stesso anche all'esterno dell'unità abitativa (solo modalità aspirante). Nello schema seguente, si possono trovare tutte le indicazioni e gli elementi per una corretta scelta dei moduli, del motore e delle tubazioni necessarie all'installazione.

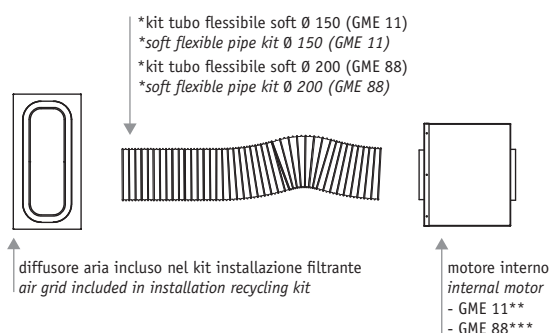

Up is available in a number of different configurations. You can choose the number of aspiration modules (1-3), adding extra ones to the standard module as required. The standard and optional modules are available in 4 different finishes. Up can be easily installed in false ceilings alongside the motor (both recirculation or ducted configurations are possible); the motor can also be installed outside your home or flat (ducted configuration only). The following diagram gives you all the information and details you need to choose the right combination of modules, motor and pipes for your desired set-up.

MODALITÀ D'INSTALLAZIONE installation mode

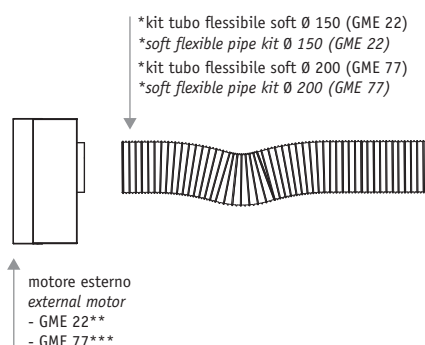

ASPIRANTE CON MOTORE INTERNO duct out with internal motor

FILTRANTE CON MOTORE INTERNO recycling with internal motor

ASPIRANTE CON MOTORE ESTERNO duct out with external motor

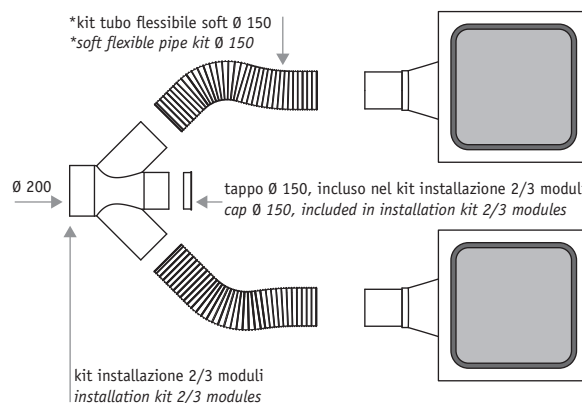

COMPOSIZIONE MODULI module composition

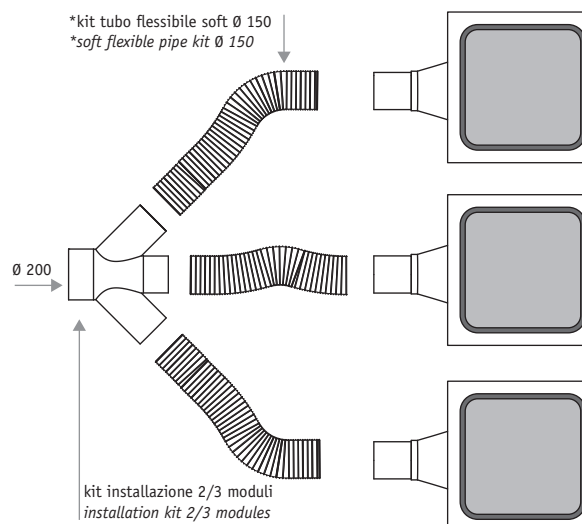

1 MODULO 1 modules (PRESTAZIONI STANDARD CON GME 11 E GME 22, ALTE PRESTAZIONI CON GME 77 E GME 88) (normal performances with GME 11 and GME 22, high performances with GME 77 and GME 88)

2 MODULI 2 modules (SOLO CON GME 77 E GME 88 only with GME 77 and GME 88)

3 MODULI 3 modules (SOLO CON GME 77 E GME 88 only with GME 77 and GME 88)

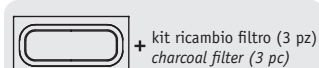

* da acquistare separatamente, ulteriori dettagli a p. 169 to be purchased separately, see more details at p. 169

** da utilizzare nell'installazione a un modulo to be used in the single module installation

*** da utilizzare nell'installazione a 2/3 moduli; consigliato per alte performance nell'installazione a 1 modulo to be used in 2/3 modules installation; advisable to obtain high performances in the single module installation

Perché la cappa

Why a range hood

La cappa assicura comfort e benessere in cucina, luogo di convivialità e stimolo per i sensi. La cappa rende viva la cucina e la fa respirare. La sua funzione principale consiste nel migliorare la qualità dell'aria, eliminando i fumi della combustione, i cattivi odori e i vapori della cottura, dannosi sia per l'organismo che per mobili e pareti.

La cappa è un prezioso alleato del tuo benessere.

Per questo scegliendo una cappa ci si deve assicurare che garantisca:

- Un'aspirazione adeguata alle tue necessità;
- Una fonte di luce efficace per renderti più confortevole la preparazione dei cibi;
- Un design in linea con i tuoi gusti e le tue esigenze;
- Una buona usabilità e silenziosità.

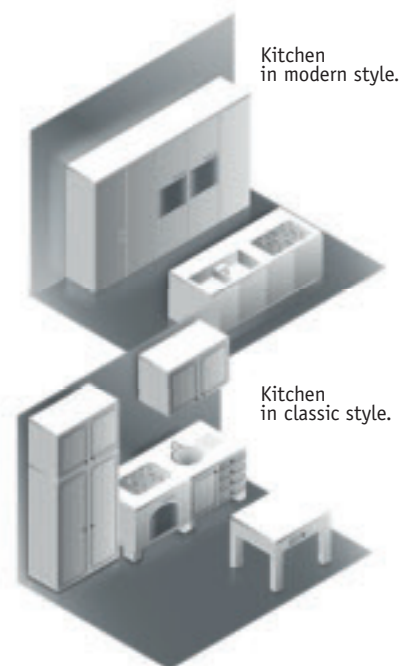

The kitchen hood ensures comfort and well-being in the kitchen, the place of culinary exploration and stimulus for the senses. The range hood breathes life into the kitchen.

The range hood's main function is to improve the quality of air by eliminating fumes, unpleasant odors, and cooking vapors, which can be harmful to both you and your home.

The range hood is a valuable ally for your well being.

That's why when choosing a range hood, you need to ensure that it provides:

- Sufficient suction to meet your needs;
- An effective light source to facilitate food preparation;
- A design that suits your tastes and your needs;
- A high level of usability and a low noise level.

A quale modello aspiri?

What style fits you?

La cappa esalta il carattere della cucina, donandole una nuova identità. Grazie all'estetica, alla raffinatezza dei dettagli e alla ricerca dei materiali, la cappa è l'oggetto capace, da solo, di definire e arredare i tuoi spazi. Molteplici sono le possibilità d'installazione:

1) A parete: la cucina è posizionata contro la parete con il piano cottura in adiacenza al muro (cappa da installare a parete)

2) A isola: la cucina è posizionata a centro stanza con il piano cottura distante dal muro (cappa da installare a soffitto)

3) A angolo: la cucina è sviluppata tra due pareti della stanza e il piano cottura è posizionato a ridosso dell'angolo (cappa da installare tra le pareti adiacenti)

4) A incasso: il piano cottura è posizionato sotto un pensile (cappa da installare all'interno del pensile)

Scegli una cappa che faciliti il tuo lavoro in cucina, che ti dia libertà di movimento e semplifichi la preparazione dei cibi. La cappa deve essere efficiente, deve avere elevate performance di aspirazione, illuminazione e silenziosità.

La cappa deve avere anche la giusta potenza di aspirazione. Valuta le dimensioni della tua cucina e le tue abitudini culinarie: solo così otterrai il giusto ricambio dell'aria e un minor consumo di energia elettrica.

La potenza di aspirazione o portata (espressa in m^3/h) è il volume d'aria che una cappa aspira in un'ora. Se hai una famiglia poco numerosa o cucini pasti veloci è sufficiente un modello fino a $450 m^3/h$ (5);

per chi cucina spesso, ha molti amici o una famiglia numerosa la potenza d'aspirazione dovrà essere maggiore di $500 m^3/h$ (6).

The extractor hood enhances the character of your kitchen and gives it a new identity.

Thanks to their attractive appearance, refined details and premium materials, extractor hoods are capable of defining and decorating your kitchen single-handed.

A wide range of installation options is available:

1) Wall-mounted: the kitchen units are located against the wall with the cooktop adjacent to the wall (extractor to be wall-mounted)

2) Island: the main kitchen unit is located in the middle of the room with the cooktop away from the wall (hood to be ceiling-mounted)

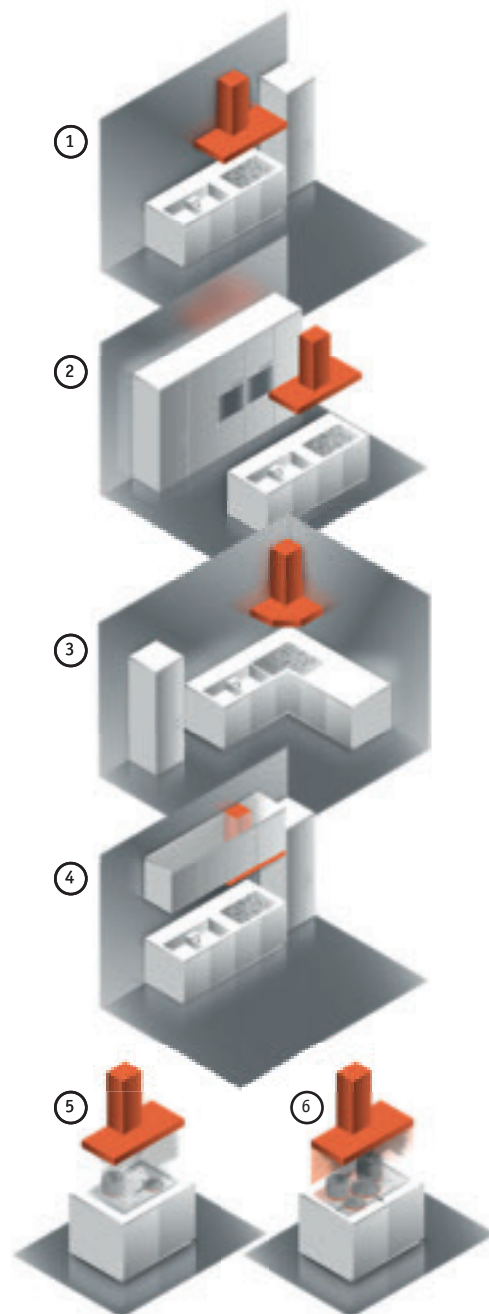

3) Corner: the kitchen units extend along two walls and the cooktop is located in the corner between them (extractor hood to be installed between the two adjacent walls)

4) Built-in: the cooktop is located beneath a wall-unit (extractor hood to be installed inside the wall unit)

Choose an extractor hood that facilitates your work in the kitchen, affords freedom of movement and simplifies food preparation. The extractor hood must be efficient and offer high suction performance, good lighting and low noise.

the extractor hood also needs the right level of suction power. Bear in mind the size of your kitchen and your cooking habits: this is the only way to ensure the right air flow and minimise electricity consumption.

The suction power or capacity (expressed in m^3/h) is the volume of air that an extractor hood aspires in one hour. If you have a small family and you cook quick meals, a capacity of up to $450 m^3/h$ is sufficient (5); if you cook often, or have frequent dinner parties or a large family you need suction capacity of more than $500 m^3/h$ (6).

Per una corretta installazione

For a correct installation

Il perfetto funzionamento della cappa è assicurato da una corretta installazione, garantita da personale specializzato. Il montaggio e la manutenzione variano in base alle due tipologie di cappa:

6) La cappa aspirante: espelle l'aria all'esterno dell'abitazione. È la tipologia più diffusa in quanto garantisce elevate prestazioni, alta portata e bassa rumorosità.

7) La cappa filtrante: sottrae i cattivi odori con il filtro odori e re-immette l'aria nell'ambiente cucina. Questa tipologia è adatta in situazioni prive del foro di evacuazione e permette un risparmio energetico, evitando dispersioni verso l'esterno.

Tutti i modelli Elica sono predisposti per lavorare in entrambe le versioni.

Prima di procedere all'installazione della tua cappa, tieni a mente queste semplici regole di base:

- Segui tutte le fasi indicate nel libretto di istruzioni del prodotto;
- In caso di difficoltà richiedi l'intervento di un tecnico specializzato di tua fiducia;
- Collega la cappa aspirante all'esterno con una tubazione dedicata dal diametro 120/150 mm.: una lunghezza ridotta e l'assenza di curvature garantiscono prestazioni ottimali.
- Rispetta la distanza minima dal piano cottura, indicata nel libretto, al fine di evitare danni alle parti funzionali e salvaguardare la sicurezza delle persone;
- Controlla che la posizione della presa elettrica sia in prossimità del prodotto per il collegamento.

For correct operation of your range hood; professional installation by a specialized technician is the key.

Assembly and maintenance vary according to the two types of range hood:

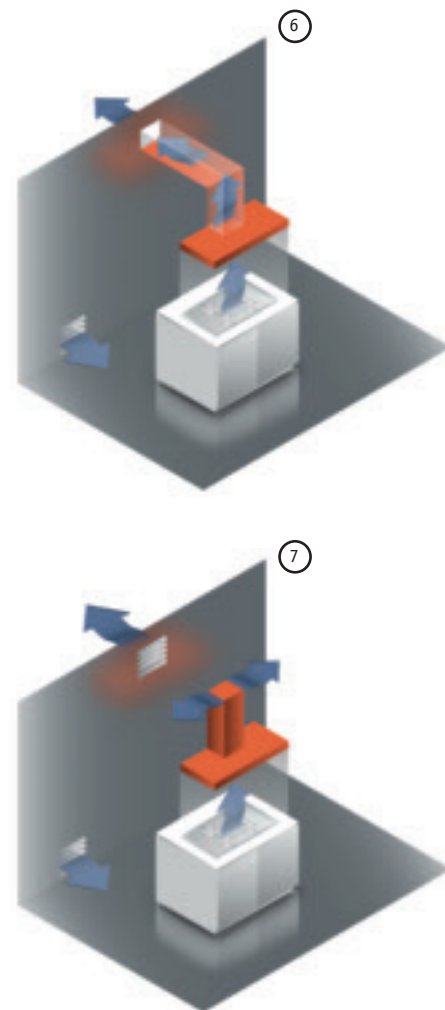

6) Duct-out hoods: exhaust air to the outdoor atmosphere. This type is most used type because they offer high performance, high capacity and low noise.

7) Recirculating hoods: remove unpleasant odors from the air by means of a charcoal and grease filter before re-introducing the air into the kitchen. This type is suitable for kitchens with no extractor duct and also avoids thermal losses to the outside atmosphere.

Nearly all Elica models are capable of operating in both modes.

Before installing your range hood, familiarize yourself with these basic rules:

- Follow all the steps shown in the instruction handbook;
- If you run into difficulties, seek assistance from a reliable, specialised technician;
- Connect duct-out hoods to the outside atmosphere with a dedicated pipe with a diameter of 4-3/4 inches – 6 inches: minimizing the ducting distance and avoiding unnecessary bends maximizes performance;
- Comply with the minimum distance from the cooktop specified in the handbook, in order to ensure safety and avoid damage to working parts;
- Make sure that the electric socket is close enough to the hood for connection.

Lunga vita alla tua cappa

Long live your range hood

Per assicurare una lunga durata alla tua cappa, devi mantenere in ottimo stato il sistema di filtraggio. Sono due le tipologie di filtro:

8) Il filtro grassi: protegge la tua cappa trattenendo le particelle di grasso. Richiede una pulizia periodica a mano con detergente neutro o in lavastoviglie a basse temperature;

9.1-9.2) Il filtro odori a carboni attivi: cattura e trattiene le particelle odorose dell'aria. Ricorda di sostituirlo ogni 3-4 mesi.

Altre piccole accortezze ti aiuteranno a mantenere sana ed efficiente la tua cappa:

- Accendi la cappa alla prima velocità a inizio cottura, aumentando l'aspirazione nel momento in cui c'è la maggiore produzione di fumo e odori. A cottura conclusa, ritorna alla velocità più bassa e mantieni la cappa accesa per altri 5-10 minuti;
- Provedi regolarmente alla pulizia interna ed esterna della cappa, ricordandoti di staccare la spina dalla presa o chiudi l'interruttore della cappa prima di procedere;
- Chiudi le finestre quando la cappa è in funzione;
- Spegni la cappa quando nel caminetto hai il fuoco acceso;
- In caso di guasti, rivolgiti sempre a tecnici qualificati.

To ensure the long life and correct operation of your range hood, the first step is to keep the filtering system in good condition.

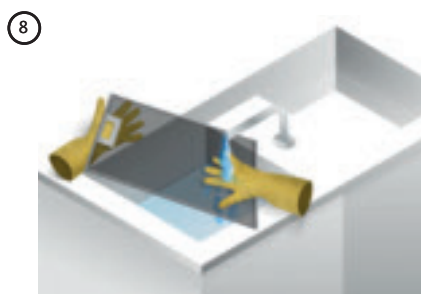

There are two types of filters:

8) The grease filter: protects your range hood by trapping particles of grease. It requires periodic cleaning by hand with neutral detergent or in the dishwasher at low temperature;

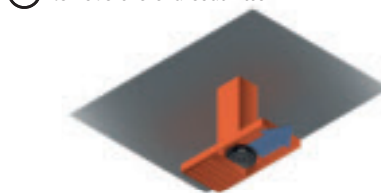

9.1-9.2) The active, charcoal filter: removes and traps odor particles from the air. Charcoal filters should be replaced every 3-4 months.

Other precautions that will also help keep your range hood in perfect condition:

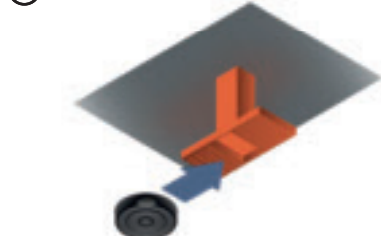

- Switch the hood on at speed 1 when you start cooking, and increase fan speed as the intensity of fumes and odors increases. When you have finished cooking, return to minimum speed and keep the hood switched on for another 5-10 minutes;
- Clean the hood regularly both inside and out; remember to disconnect the plug from the outlet or switch it off before proceeding;
- Close the windows when the range hood is running;
- Turn the hood off if you have a fire going in your fireplace;
- In the event of failure, always consult a qualified technician.

9.1 Remove the charcoal filter

9.2 Insert the new charcoal filter

SERVIZI

services

Elica ti offre di più! Elica mette a disposizione un mondo di servizi per mantenere i suoi prodotti sempre efficienti e giovani. Accompagniamo i nostri clienti anche dopo l'acquisto avendo cura del loro tempo e della loro nuova cappa. Semplificare la vita ai nostri clienti! Questo l'imperativo di Elica.
