 Speed specifications have been updated to reflect current industry testing methods.

 Duty cycle is defined as the maximum number of pages per month of inspend output. This update provides a comparison of sectors reductions.
- Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP Laser Jet or HP Color Laser Jet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups.

 HP recommends that the number of printed pages per month be within the stated range for optimum device performance, based on factors including supplies replacement
 Power requirements are based on the country/region where the printer is sold. In our convert practing voltages. This will damage the printer.
- Fower requirements are based on the country region where the printer is sold. Do not convert operating voltages. This will damage the printer and void the product warranty.
