WARNING: Use this mounting system only for its intended use as described in these instructions. Do not use attachments not recommended by the manufacturer.

WARNING: Never operate this mounting system if it is damaged. Return the mounting system to a service center for examination and repair.

WARNING: Do not use this product outdoors.

IMPORTANT ! : The CMS115 is designed to be mounted to 2" x 4" wood stud joists.

--SAVE THESE INSTRUCTIONS--

IMPORTANT SAFETY INSTRUCTIONS

WARNING: A WARNING alerts you to the possibility of serious injury or death if you do not follow the instructions.

CAUTION: A CAUTION alerts you to the possibility of damage or destruction of equipment if you do not follow the corresponding instructions.

WARNING: Failure to read, thoroughly understand, and follow all instructions can result in serious personal injury, damage to equipment, or voiding of factory warranty! It is the installer's responsibility to make sure all components are properly assembled and installed using the instructions provided.

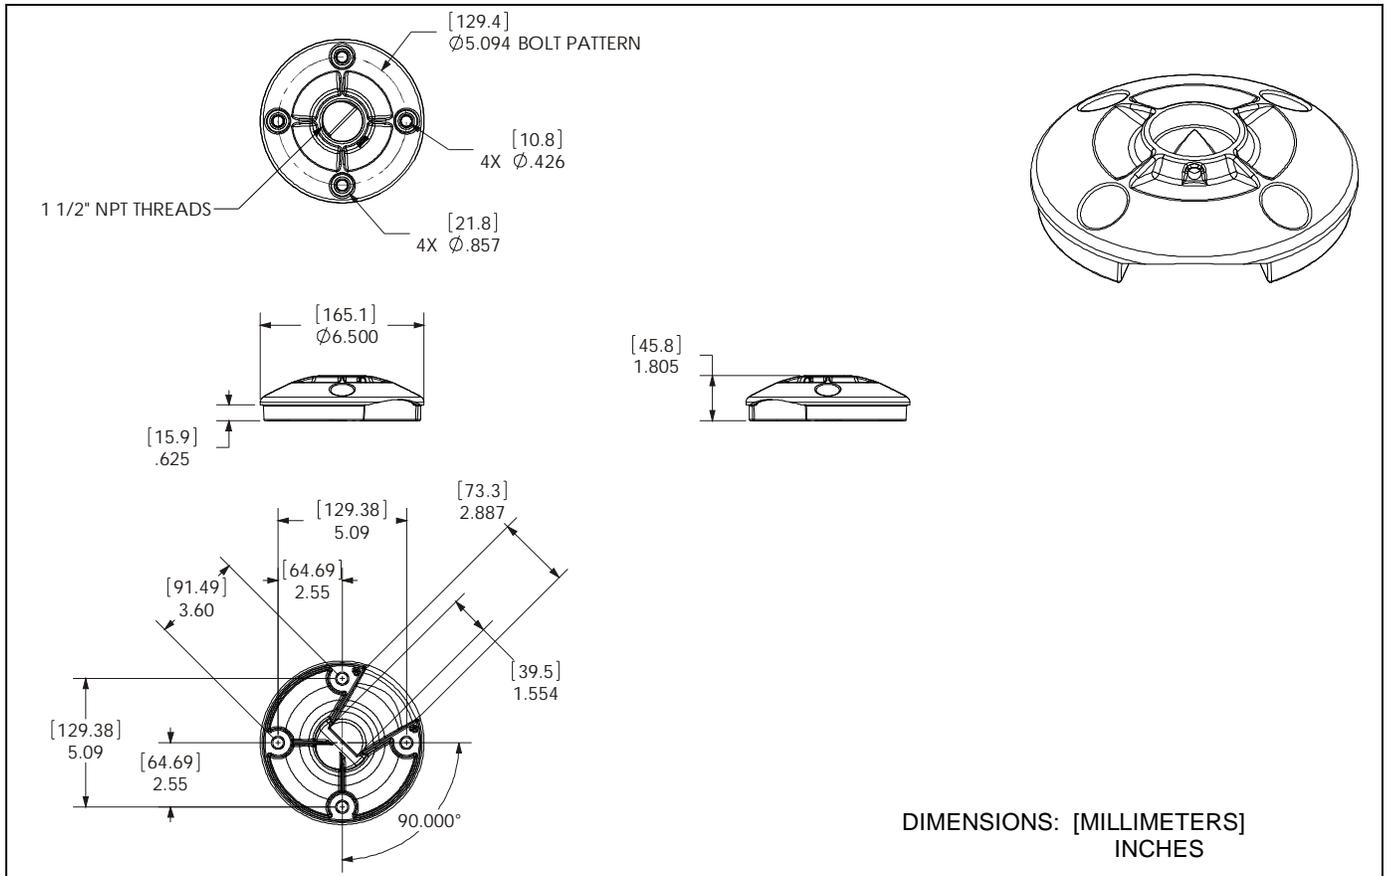

WARNING: Failure to provide adequate structural strength for this component can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the structure to which this component is attached can support five times the combined weight of all equipment. Reinforce the structure as required before installing the component.

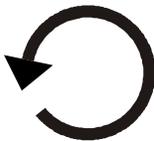

WARNING: Exceeding the weight capacity can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the combined weight of all components attached to the CMS115 does not exceed 500 lbs (227 kg).

TOOLS REQUIRED FOR INSTALLATION

PARTS

INSTALLATION

WARNING: Failure to provide adequate structural strength for this component can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the structure to which this component is attached can support five times the combined weight of all equipment. Reinforce the structure as required before installing the component.

1. Using ceiling plate (A) as a template, mark locations of two pilot holes (See Figure 1). Ensure the following:
 - Use *OPPOSITE* holes in plate (A), and
 - Marks are in the center of wood joist.

NOTE: Drywall not shown for clarity.

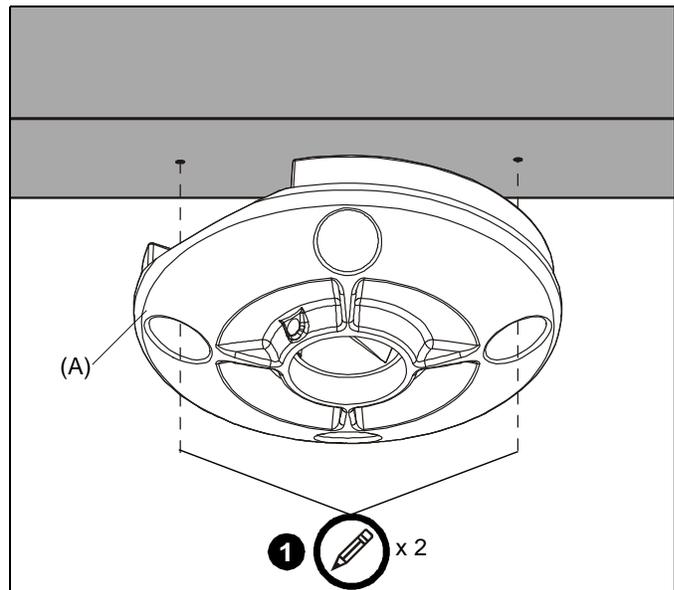

Figure 1

2. Drill 1/4" diameter pilot holes into wood joist (See Figure 2). Ensure pilot holes are straight.

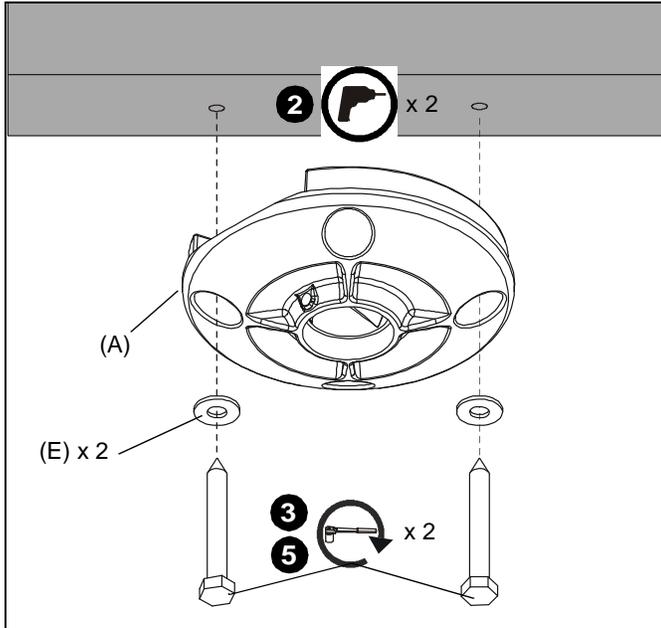

Figure 2

3. Using 9/16" socket wrench, loosely install two (minimum) Grade 2 (not included) 3/8" x 2-1/2" lag screws through 3/8" washers (E), ceiling plate (A), into wood joist (See Figure 2). Do not tighten plate (A) against ceiling at this time to accommodate cable installation.

NOTE: Two additional washers are provided.

4. Route cables through channel in ceiling plate (A) (See Figure 3).

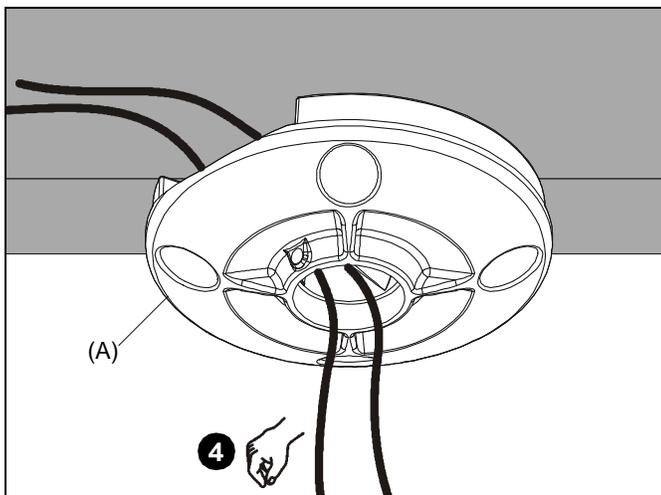

Figure 3

5. Tighten lag screws (See Figure 2).

WARNING: Exceeding the weight capacity can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the combined weight of all components attached to the CMS115 does not exceed 500 lbs (227 kg).

6. Route cables through extension column (not included).
7. Using pipe wrench, install 1-1/2" NPT or NPSM following ANSI/ASME B1.20.1 (Schedule 40, 0.154" minimum thickness aluminum - ASTM B221) threaded extension column (not included) into threaded collar of ceiling plate (A) until tight, with a minimum of four threads engaged.
8. Using hex key (D), secure extension column by *one* of the following methods (See Figure 4):
 - Install one 5/16" x 1/4" set screw (B) into threaded hole, tightening firmly against column.
 - **OPTIONAL:** Install one 5/16" x 1/4" security set screw (C) into threaded hole, tightening firmly against column.
