SIMPLE & EFFECTIVE MAINTENANCE

USB Data Cloning

USB data cloning makes managing multiple displays more efficient for optimal operation. No need to set up each display one by one, data can be copied to a USB in one display, data will be distributed to other displays through a USB plug-in.

Self Diagnostics via USB

Enables service engineers to recognize technical issues in a TV quickly and easily through a USB. The TV stores any technical issues encountered and can output them to a USB device. Service engineers use this information to analyze technical issues without the actual TV.

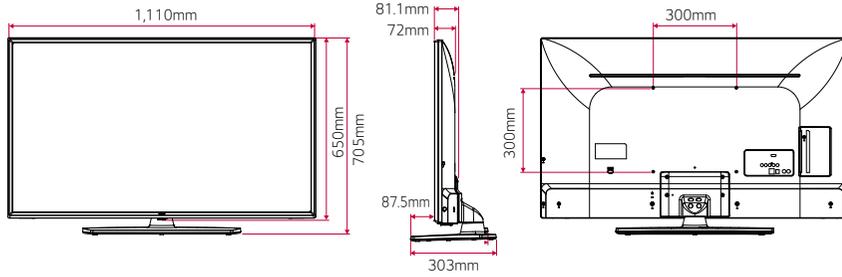

IR Out

Using the interactive set-top-box, all LG TVs can be controlled with a single remote.
