

EVoline® BackFlip

When closed, the BackFlip fits flush on the work surface, giving enhanced protection against liquid spillages. At a touch of a finger, it flips 180 degrees to reveal its function.

Two power sockets and a USB charger are revealed. The raised position provides further protection against spillages. With a total installation height of just 53 mm, the BackFlip can be fitted above most drawers, including a fitted cutlery drawer.
