

ThinkBook 15 G3 ACL

Designed to match the needs of the modern professional for anytime, anywhere productivity, this laptop is one of the thinnest and lightest available at this price range. Yet it packs in up to 8-core AMD Ryzen 5000 Series mobile processors that can make light of even compute-intensive workloads. The optional FHD display with narrow bezels, 100% sRGB colour gamut and TÜV Rheinland low blue-light certification delivers stunning visuals with minimal eye strain.

Packed with innovative features that include a power button with integrated fingerprint reader for easy authentication, AI-based noise cancelling technology that minimizes ambient noise during meetings and a service hotkey that enables access to Lenovo support with just a keystroke.

The device offers significantly better cooling than the previous generation – users can adjust the PC's performance, balancing fan speed, thermal capacity, and battery life. Optional WiFi 6 technology enables faster internet speeds.

Smart Power On touchkey replaces the power button, ensuring biometric authentication every time somebody uses the device.

Lenovo devices that are a class apart

ThinkBook combines the style and user experience of consumer devices with the security and business-class support of ThinkPad.
