

XD-V35 Digital Wireless

Professional 24-bit Digital Wireless Systems

The Line 6 XD-V35 series of digital wireless handheld and lavalier systems sets a new standard in professional wireless systems for active vocalists, performers and spoken word presenters.

Featuring exclusive microphone modeling technology, the XD-V35 handheld mic delivers a spectacular model based on* the industry-standard Shure® SM58® microphone for full, rich tone.

The signal from an XD-V35 or XD-V35L digital wireless system is so clear and strong that it sounds just like you're using a wired microphone. Unlike traditional analog wireless, there's no compression or expansion in the signal chain. The premium capsules capture your voice perfectly and the system transmits a full 10Hz–20kHz frequency response and wide dynamic range up to 118dBA, giving a huge amount of headroom for the clearest possible sound. Featuring six always-available channels, XD-V35 systems provide license-free operation worldwide and one-step setup, no need for RF tuning or intermodulation calculators.

Ensuring peace of mind and the most reliable performance, XD-V35 systems operate in the 2.4GHz band, which is free from interference due to TV broadcast, public safety announcements, cell phone towers and other transmitting devices. Encoded DCL™ (Digital Channel Lock) technology prevents reception of any audio interference from other 2.4GHz devices and ensures signal integrity. It all combines to transmit every nuance of your performance with no degradation in quality across the entire 275-foot (83-meter) range.

- Precision microphone modeling and EQ filter modeling technologies
- Superior 24-bit, compander-free vocal reproduction
- Patented, 4th-generation Line 6 digital wireless platform
- One-step setup, portable desktop format

XD-V35 Digital Wireless

Professional 24-bit Digital Wireless Systems

FEATURES

- Professional digital wireless systems for performing vocalists
- License-free operation worldwide
- Accurate and precise vocal reproduction with full-range 10Hz–20kHz (-2.5dB) frequency response, wide dynamic range (XD-V35 = 115dBA; XD-V35L = 118dBA), superior transient response and 24-bit digital conversion
- Patented, 4th-generation digital wireless technology surpasses analog wireless systems in wireless reliability and sound quality
- One-step setup
- 2.4GHz band operation, free from interference due to TV broadcast, white space devices, and cell phone towers
- 6 always-available channels
- 275-foot (83-meter) extended range—10 feet away or 200 feet away, you get full-quality audio (Note: actual range will depend on RF interference sources nearby including line-of-sight obstacles)
- Premium dynamic microphone capsule (XD-V35) or cardioid condenser microphone (XD-V35L)
- Road-ready polycarbonate transmitter and receiver chassis
- FCC compliant; immune to the FCC Consumer Alert regarding wireless microphones
- System includes microphone transmitter (XD-V35) or lavalier mic plus bodypack transmitter (XD-V35L), desktop receiver and two AA alkaline batteries
