Gigabit Ethernet PoE+ Easy Smart Managed Switches

## Control and Configure Beyond Plug-and-Play

NETGEAR Easy Smart Managed Switches with PoE+ meet the needs of growing businesses by providing fundamental network features such as simplified VLANs, QoS set-up and IGMP Snooping that help optimize the performance of the network. Easy Smart Managed Switches are the perfect upgrade from the basic Unmanaged Switches, delivering essential networking management features at a very affordable price. These models support Power-Over-Ethernet (PoE) and can power devices such as VOIP phones, surveillance IP cameras, wireless access points and many other PoE devices. These new Gigabit Ethernet PoE+ Easy Smart Managed Switch models include uninterruptable PoE to help optimize the performance and troubleshooting of business networks. The new and improved business-friendly GUI allows easy management and simple configuration. With the growing deployment of applications and an all-in-one solution, providing management and power to these applications would be ideal.

Highlights

- Enable network configuration and management at an affordable price

- Simple, yet useful network set-up on top of plug-and-play connectivity

- Business-friendly and easy-to-use mobile-device friendly web browser-based management GUI

- VLAN support for traffic segmentation

- Quality of Service (QoS) for traffic prioritization

- Auto "denial-of-service" (DoS) prevention

- Troubleshoot connection issues via cable test

- Loop prevention[1], loop detection[2], and broadcast storm controls

- Rate limiting for better bandwidth allocation

- Port mirroring for network monitoring

- Jumbo frame support

- Advanced features such as per port PoE controls

- Uninterrupted PoE keeps PoE power on even when the switch is updating firmware or performing a soft reboot

- 802.3at standard providing up to 30W per port

- Fanless with versatile mounting options (desktop and wall-mountable)
