

A vibrant collage of various science experiments and craft projects. In the top left, a clear plastic bottle with an orange cap is connected to a tube that pours blue liquid into a grey tray. Next to it, a white tube is submerged in a beaker of blue liquid. To the right, a cardboard box has several colored pens (red, yellow, green, blue) stuck into it. Below the box, a glass contains a white egg floating in a liquid with horizontal layers of red, yellow, and blue. In the center, a clear plastic cup shows a red-to-blue color gradient. At the bottom left, a small orange and blue umbrella sits in a brown polka-dot container. In the bottom center, a blue sponge rests on a yellow card with a flower drawing. At the bottom right, a green paper plate with a smiley face has numerous colorful pipe cleaners hanging from it. The entire scene is set against a solid teal background.
